Storrs,, CT 06269-1063

Dear Prospective Job Candidates,

I would like to call your attention to an exciting opportunity for motivated teachers/researchers at the United States Air Force's premier institution for graduate education, the Air Force Institute of Technology (AFIT), which is on Wright Patterson Air Force Base, in Dayton, Ohio. We currently have a tenure-track assistant/associate position for an economist to teach in the cost and financial analysis program.

The Department of Systems and Engineering Management is an interdisciplinary department offering degrees in a number of disciplines, such as rapid technology development, engineering management, information resources management, cost and financial analysis, environmental science and engineering to include occupational health, and systems engineering. Within the department, we have a specific need to hire someone who is comfortable teaching subjects primarily concentrated in the econometrics and microeconomics fields. Responsibilities will include teaching mathematical economics, introductory and applied econometrics, as well as classes in the regional, public, and industrial organization areas. Individuals will also have the opportunity to supervise graduate research. Competitive individuals will demonstrate the potential to maintain a successful stream of research. Additionally, opportunities abound for individuals who are interested in participating in multidisciplinary research, with many platforms available to immediately begin making a positive contribution to the research output of this department.

Interested individuals must be a U.S. citizen. Initial application materials include a letter of application, a curriculum vita, and at least three letters of recommendation. Application materials must be submitted by email and may also be submitted by traditional postal service to:

Department of Systems and Engineering Management
