Instructor: Dr. John Bennett Jr
Castleman 206
Wednesday 3-3:50PM
PeopleSoft #: 3099

Students need to be effective problem solvers no matter what major or career field they plan to pursue. It is argued that every situation faced will lead to better outcomes in a faster time period if that situation is addressed as a “problem to be solved.” Whether it’s learning for retention and ease of application, managing your time, or gaining experiences important to a successful career and personal life, this class can have a significant impact on the outcomes.
