JUNE 27, 2017, 12:15 PM

**U**Conn Extension's Bug Week is right around the corner, from July 24th to 29th, and we have programs for the whole family.

Bugs are the unsung heroes of our ecosystem, providing services such as pollination and natural pest control. However, bugs don't stop at environmental benefits. They have also impacted our culture through the manufacturing of silk, sources of dyes, wax and honey production, food sources, and the improvement of building materials and structures. There are also problem bugs, like the Emerald Ash Borer and Brown Marmorated Stink Bug that are a concern in Connecticut. Visit our website at [www.bugs.uconn.edu](http://www.bugs.uconn.edu) for featured insects and resources.

All ages are welcome to attend and explore the activities and events dedicated to insects and their relatives.

Bug Week programs include:

- Pests and Guests will be held at the Tolland Agricultural Center in Vernon on Monday, July 24th at 5:30 PM. Activities include: cooking with bugs, games and demos for the whole family, and learning about bugs in the garden. Please register at <http://s.uconn.edu/3r7> or call 860-486-9228.
- Insect Wonders at the Farm: Join UConn Extension faculty and Spring Valley Student Farm staff and students for an interactive, fun-filled 'buggy' event. Learn about our amazing and important insect friends by collecting and observing them. Activities for the whole family will include insect collecting, insect-inspired crafts, Bug-Bingo and a scavenger hunt. This event will be held on Tuesday, July 25th from 9-10:30 AM. The rain date is July 26th.
- Join the Museum of Natural History, AntU and the Department of Ecology and Evolutionary Biology for an exciting afternoon on campus on Thursday, July 27th from 12:30-4:30 PM. We have tours of the insect collections, an AntU presentation, plus exhibit activities, microscope stations, giveaways, and a live ant colony. There will also be special greenhouse displays. Please register at <http://s.uconn.edu/3r7>
- Pollinators at Auerfarm in Bloomfield on Friday, July 28th from 9 AM -12 PM will have a station at the beehive, pollinator plants, and a hands-on make and take activity. The farm is home to a Foodshare garden, 4-H programs and more, offering fun for the entire family. Please register at <http://s.uconn.edu/3r7> or 860-486-9228.
- Find out all about insects and where to look for them at Bug Walks at the Tolland Agricultural Center in Vernon on Saturday, July 29th from 10 AM-1 PM. The program will have live insects on display, right out in the open, plus part of the insect collection from the UConn Natural History Museum, as well as three bug hunts that include going to the butterfly/pollinator garden and the vegetable garden on the property.
- A photo contest is being offered, with three categories: junior, senior and professional. More details can be found at: <http://bugs.uconn.edu/photo-contest/>

UConn Extension offices are located across the state and offer an array of services dedicated to educating and informing the public on innovative technology and scientific improvements. Bug Week is one example of UConn Extension's mission in tying research to real life, by addressing insects and some of their relatives. For more information on Bug Week, please visit our website at [www.bugs.uconn.edu](http://www.bugs.uconn.edu), email [bugweek@uconn.edu](mailto:bugweek@uconn.edu) or call 860-486-9228.
